THE BARBERRY ERADICATION PROBLEM

WEDNESDAY, DECEMBER 8, 1926

9:00 A. M.

Chairman, Dr. F. E. Kempton

SURVEY AND ERADICATION

Surveys

Original Survey

1. Necessity for further original survey
2. Selection of counties for original survey
3. Detailed explanation of original survey methods used
4. Completion of original survey
  - (a) Time of survey in relation to other surveys
  - (b) Methods that should be adopted

Second Survey

1. Selection of counties surveyed
2. Efficiency of second survey completed
3. Procedure of second survey
4. Detailed explanation of second survey methods used
5. Completion of second survey
  - (a) Areas in which second survey is necessary
  - (b) Methods that should be adopted

NINTH ANNUAL MEETING OF THE LEADERS IN BARBERRY ERADICATION

AND

STEM-RUST EPIDEMIOLOGY

AND

MEMBERS OF COOPERATING AGENCIES

---

OFFICE CEREAL CROPS AND DISEASES

BUREAU OF PLANT INDUSTRY

UNITED STATES DEPARTMENT OF AGRICULTURE

---

DECEMBER 8 and 9, 1926

---

PLANT PATHOLOGY BUILDING, UNIVERSITY FARM,

ST. PAUL, MINNESOTA.

---

THURSDAY, DECEMBER 9, CONTINUED

Educational methods used by State leaders in past years and in 1926

1. Plans for an educational campaign
2. Cooperation
3. Future educational plan that should be adopted

1:00 P. M.

Chairman, Dr. F. E. Kempton

ADMINISTRATION

Supervision in States

1. Office management
2. Organization of field force
3. Cooperation with State officials
4. Determining survey efficiency
5. Expenditure of allotment and State aid
6. Reports
  - a. Reports to the Washington Office
  - b. Reports to the Conference for the Prevention of Grain  
Rust and other cooperating agencies
  - c. Field records and reports

WEDNESDAY, DECEMBER 8, CONTINUED

8:00 P. M.

INVESTIGATIONS

Chairman, Dr. H. B. Humphrey

Problems

Problems other than Epidemiology Studies

Epidemiology Studies

1. Cooperation of epidemiology and barberry eradication forces -  
Dr. E. C. Stakman
2. Cooperation with Federal, State and college officials
3. Advisability of field men reporting other diseases and pests

THURSDAY, DECEMBER 9, 1926

9:00 A. M.

Chairman, Dr. H. B. Humphrey

PUBLICITY AND EDUCATION

Report of the publicity and educational activities of the Conference for the  
Prevention of Grain Rust for 1926 - Donald G. Fletcher

Report of the Federal publicity and educational activities of 1926 -  
Noel F. Thompson

Publicity methods used by the State leaders in past years and in 1926

1. Principal types
2. Publicity agent
3. Cooperation with State and other agencies
4. Publicity methods that should be adopted for future use

WEDNESDAY, DECEMBER 8, CONTINUED

Third Survey

1. Necessity of a third survey
2. Procedure of preliminary third survey
3. Results of preliminary third survey
4. Methods that should be adopted for third survey

Resurvey

1. Basis for selection of counties
2. Policies of resurvey
3. Exact portion of property or adjacent properties covered and methods used
4. Methods that should be adopted for resurvey

1:00 P. M.

Areas of Escaped Barberries

1. Policies of survey and eradication in areas of escaped bushes
2. Procedure that should be adopted for clearing areas of escaped bushes and seedlings
3. Distribution of seeds

Simultaneous Surveys

1. As a means of finding the last barberry in each local area

Eradication

Chemical

1. Sources and use of chemicals

Digging or pulling

1. Advisability of digging or pulling any bushes or seedlings

Seasonal eradication
